

CHAIN LINK PAVILION

North Salem, New York

PHILIP JOHNSON • ALAN RITCHIE
A R C H I T E C T S

This garden pavilion derives from artistic experiment with traditional geometry. The focus is the pyramid, albeit here it is done using several pyramids and colliding them together to form interesting intersections. The semi-transparent chain link material reinforces this. Shadow and light forms fascinating patterns over and within the surface of the pavilion.

For a long time Philip Johnson/Alan Ritchie Architects has engaged in projects such as this, in addition to their well-known work in large-scale structures. Johnson in particular, has a passion for pavilion design, which might explain why he has produced so many for his own property New Canaan, CT.
