

## IN-FONG OFFICE TOWER

Pu-Dong, Shanghai, China

PHILIP JOHNSON • ALAN RITCHIE  
ARCHITECTS

This project entailed the re-design of an existing office tower. The aesthetics of the two new designs for the building's exterior play off the strength and integrity of the building's structural system. The simple geometry of a square within a cylinder was used to generate the strong impact the designs have on the Pu-Dong skyline. The tower entrance plaza has been enclosed to create a "crystal pavilion" retail court.

Client: Silver Peak Development Co. Ltd.  
(Shanghai)

Associate Architect: Sun Associates
